WELCOME!

On behalf of the nursing faculty, staff, and administration of Western Nevada College (WNC), we sincerely welcome those of you who are returning to the program, and those of you who are newcomers. We hope you will find your time with us to be interesting, exciting, and educational.

To the second-year students:

The nursing faculty acknowledges your achievements and hope that you will continue to be successful. We will continue to be available to help you.

To the first-year students:

The nursing faculty is pleased that you are enrolled in the program and appreciates that you selected WNC to pursue your educational goals. Assistance is available to each one of you throughout your educational experiences at WNC from nursing faculty, staff, and administration and student services.

The material in this handbook supplements the Western Nevada College Catalog. It presents the Associate Degree Nursing (ADN) Program of study, current requirements, and policies. You will find yourself referring to it frequently.

This handbook provides information about the program and its policies for all nursing students in the Associate Degree Nursing Program at Western Nevada College. The material in the handbook provides information to assist students to learn about the curriculum, understand their responsibilities as students, and comply with policies and procedures. Each student is responsible to know, understand and follow the information in the publication.

As a general rule, changes in policies and procedures become effective at the start of the fall semester. Therefore, new and returning students are to attest that they have read and understand the information contained in the *Nursing Program Student Handbook* by signing and submitting the Nursing Program Signature Page. (Appendix J). Dates for submission of the signature page will be provided by the faculty.

Any change in policies and/or procedures made during the academic year will be distributed to students in writing and will be published on the Nursing & Allied Health website.

We wish you every success and hope you will enjoy the journey that is before you.

Faculty, staff and administration

Office Hours

Full-time faculty members will maintain a minimum of five (5) office hours per week across three days. The hours are posted on their office door, in Canvas, and in the course syllabi.

Class Cancellations

Nursing faculty will utilize a variety of methodologies to contact students in the event of a cancellation or late start of a learning experience. Class cancellations will be posted on the WNC Facebook page, as well as the WNC homepage at www.wnc.edu. Students are advised to check their telephone message systems or email prior to leaving for the learning experiences.

SECTION I:

MISSION, PHILOSOPHY, ORGANIZING FRAMEWORK, STUDENT LEARNING OUTCOMES, PROGRAM OUTCOMES AND PROGRAM STANDARDS

Western Nevada College Mission Statement

WNC contributes to solutions for the 21st century by providing effective educational pathways for the students and communities of Nevada.

Nursing Program Mission Statement

The Nursing Program reflects the mission of Western Nevada College by assisting and preparing nursing students to successfully navigate educational pathways to achieve their professional goals.

Nursing Program Philosophy

Learning

Involves the incorporation of information and skills to promote knowledge and change behavior. Faculty strives to incorporate a variety of teaching modalities that reflect a respect for nursing student diversity.

Education

The faculty serves to develop a process for the acquisition of knowledge, skills, and attitudes and ultimately, a commitment to life-long learning. The education of students must therefore incorporate concepts of evidence-based practice, teamwork and collaboration, quality improvement, effective use of technology, and therapeutic communication strategies to achieve safe patient care. Faculty serves to develop a process for the acquisition of knowledge

Nurse Educator

Is a profession practiced by knowledgeable individuals who hold a minimum of a Master's degree in nursing and who function as facilitators, communicators, role models, and mentors in all environments where the teaching/learning/coaching processes occur. Nurse educators believe in the value of maintaining currency in nursing practice and standards.

Nursing

Nursing is a profession wherein nurses provide care in ways that reflect responsibility and adherence to legal and ethical practices. Nurses advocate for patients, families and themselves in caring ways that value and protect the rights of self-determination, and maintenance of integrity, dignity, and personal growth.

Critical Thinking/Clinical Judgment

Critical thinking/clinical judgment incorporates nursing science, critical thinking, and a spirit of inquiry to direct practice decisions for the delivery of safe, quality care that promotes the health of patients.

Organizing Framework of the Nursing Program

The organizing framework flows from the Nursing Program mission, philosophy and professional guiding documents which include the National League for Nursing Associate Degree Core Competencies, the American Nurses Association Code of Ethics, National Patient Safety Standards, and Quality & Safety Education for Nurses (QSEN). The following components of the above documents are reflected in the organizing framework of the program:

- Nursing process to achieve safe, holistic care.
- Communication, documentation, and use of informatics.
- Clinical judgment based on evidence-based nursing practice.
- Caring interventions, including valuing advocacy, respect and protection of others and self.
- Teaching/learning processes.
- Collaboration and interprofessional teamwork.
- Management of patient-centered care.
- Professional behaviors.
- Quality improvement.

The program also integrates the following concepts throughout the curriculum:

- Knowledge from the bio/psycho/social sciences, humanities, mathematics and nursing science.
- Concepts and body system approaches to understand the needs of patients for the purposes of educating students to provide holistic nursing care.

Student Learning Outcomes

The nursing program philosophy, professional guiding documents and the integrating concepts are reflected in program and course student learning outcomes, clinical evaluation tools, and nursing care plans.

Upon successful completion of the nursing program, the student will be able to:

1. Incorporate principles from the bio/psycho/social sciences, mathematics, humanities, and nursing in the provision of patient care.
2. Apply the nursing process in a caring manner to safely meet the holistic needs of patients across the lifespan.
3. Utilize a broad range of communication skills to promote understanding.
4. Utilize a spirit of inquiry to integrate current evidence-based guidelines and nursing science when making clinical practice decisions.
5. Apply concepts of caring, cultural sensitivity, and respect for all persons.
6. Apply concepts of teaching and learning to empower patients and families to effectively manage healthcare.
7. Incorporate principles of collaboration and teamwork with patients, families, and the health care team to achieve patient-centered care.
8. Provide and manage care that reflects values of nursing within professional standards and legal parameters of the profession.

Revised July 2019

Nursing Program Outcomes (Benchmarks)

Three nursing program outcomes serve as a quantifiable measure of how successfully the program is in educating students to function as registered nurses.

1. Eighty-five percent or more of the students admitted into the nursing program will graduate within six semesters.
2. Eighty-five percent of graduates will pass the NCLEX-RN on the first attempt at or above the national pass rate.
3. Ninety percent or more of the graduates seeking employment will find employment in the health care settings within nine months of passing the NCLEX-RN.

Nursing Student Essential Abilities

All students accepted into the nursing program are expected to have essential abilities which are physical, cognitive and psycho/social/cultural in nature. These abilities are necessary to successfully complete the curriculum and function as an entry level professional nurse. If a student has concerns about being able to perform one or more of the essential functions, he/she may make an appointment with the Disability Officer to discuss concerns and learn about reasonable accommodations. Progression in the program may be denied if a student is unable to demonstrate an essential ability.

Physiological Functions (with examples of skills)

Motor abilities & physical Strength

- Physical strength/abilities and mobility sufficient to independently perform full range of patient care activities including moving from room to room and maneuvering in small spaces, full range of motion to twist/bend, stoop/squat, reach above shoulders, and below the waist. Motor skills, physical endurance, (clinical days may last up to 12 hours.), and strength to provide patient care (lifting 25 pounds or more/moving patients, etc.). Physical strength and mobility sufficient to perform a full range of required patient care activities including assisting with ambulation of patients, administering CPR, assisting with turning and lifting patients.

Manual Dexterity

- Demonstrate fine motor skills sufficient for providing safe nursing care. Must be able to handle small equipment (e.g., an insulin syringe), and perform patient care skills, including medication administration by all routes, as well as carry out nursing skills/procedures and perform basic lab tests.

Perceptual/Sensory Ability

- Sensory/perceptual ability to monitor and assess patients.
- Hearing sufficient to hear alarms, assess heart, bowel, and lung sounds, communicate via a telephone, and respond to patient statements.
- Visual acuity to accurately read calibrations on a 1 mL syringe, read fine print (e.g., medication and nutrition labels.), read and document on the computer, and assess for skin color. Clearly observe a person and objects at a near and far distance.
- Tactile ability to feel pulses, temperature, texture, moisture, and masses.
- Olfactory ability to detect smoke or noxious odor.
- Can gather data from written references and health record, oral presentations, demonstrations, and observations in classroom, laboratory, or clinical setting.

Cognitive Functions

- Perform math calculations (basic algebra)
- Speak, read, write and understand the English language at the 12th grade level.
- Professionally express and exchange ideas in verbal **or** written form using the English language.
- Use cognitive (thinking) abilities to measure, calculate, reason, and analyze information and data to develop an appropriate plan of care.

- Prioritize data to make decisions. Recognize an emergency and respond effectively to safeguard the patient and other caregivers.
- Transfer knowledge to accomplish application of theory principles to the practice setting.
- Utilize computers to access and store information.
- Ability to comprehend three-dimensional and spatial relationships.

Communication

- Ability to communicate in English with accuracy, clarity and efficiency with faculty, staff, students, patients, their families, and other members of the healthcare team.
- Ability to communicate using spoken and non-verbal communication, such as interpretation of facial expressions, affect and body language.
- Ability to read, including computer systems literacy.
- Can demonstrate written and oral competency in the English language as required for nursing licensure and healthcare organizations.
- Gives verbal directions to or follows verbal directions from other members of the healthcare team and participates in healthcare team discussions of patient care.
- Conveys information to patients and others as necessary to teach, direct and counsel individuals in an accurate, effective, and timely manner.
- Recognizes and reports critical patient information to other caregivers.
- Role model professional and civil communications with patients, families, instructors, peers, and all members of the healthcare team.

Psychological/Social/Cultural Functions

- Conduct self within the ethical and legal standards of practice in all practice settings.
- Effectively function in stressful situations.
- Maintain control of emotions.
- Respond professionally to angry or unpleasant persons.
- Interact therapeutically with angry or unpleasant persons.
- Work effectively in a group or as part of a team.
- Concentrate on a task without being distracted.
- Effectively manage time and respond to schedules/deadlines.
- Manage two or more activities or sources of information without becoming confused.
- Utilize problem-solving and decision-making skills.
- Adapt to change.
- Assume responsibility for own actions.

Professional Standards

Nurses have the privilege of interacting with diverse groups of people. During the course of a student's nursing education the student is expected to develop and strengthen communication skills to improve effectiveness with people. Communication involves interactions between and among students, patients, faculty, staff and guests located on campus or at off-campus learning sites (clinical facilities or other settings). Respect for individual differences in opinions, beliefs, gender, lifestyle practices, religious, racial, cultural or social backgrounds should be demonstrated by effective listening and communication skills as well as respect for physical space and privacy issues. Professional conduct standards at WNC are based on the American Nurses Association (ANA) Code of Ethics. Therefore, professional communication and behavior are expected in all interactions and in all settings. Unethical or unprofessional conduct that violates these standards may result in the imposition of an academic sanction including dismissal from the program.

American Nurses Association (ANA) Code of Ethics

The nursing program endorses the **ANA Code of Ethics** which describes ethical conduct expected of students enrolled in the program. The ANA Code of Ethics is as follows:

1. The nurse, in all professional relationships, practices with compassion and respect for the inherent dignity, worth, and uniqueness of every individual, unrestricted by considerations of social or economic status, personal attributes, or the nature of health problems.
2. The nurse's primary commitment is to the patient, whether an individual, family, group, or community.
3. The nurse promotes, advocates for, and strives to protect the health, safety, and rights of the patient.
4. The nurse is responsible and accountable for individual nursing practice and determines the appropriate delegation of tasks consistent with the nurse obligation to provide optimum patient care.
5. The nurse owes the same duties to self as to others, including the responsibility to preserve integrity and safety, to maintain competence, and to continue personal and professional growth.
6. The nurse participates in establishing, maintaining, and improving health care environments and conditions of employment conducive to the provision of quality health care and consistent with the values of the profession through individual and collective action.
7. The nurse participates in the advancement of the profession through contributions to practice, education, administration, and knowledge development.
8. The nurse collaborates with other health professionals and the public in promoting community, national, and international efforts to meet health needs.
9. The profession of nursing, as represented by associations and members, is responsible for articulating nursing values, for maintaining the integrity of the profession and its practice, and for shaping social policy.

Nursing is a “hands-on” profession. During the course of nursing students’ education, they will learn about nursing practice and demonstrate a variety of nursing skills. This means students will touch and may be touched in a learning context. At times, impressions, communications or behaviors may be misinterpreted. Honest communication with the person(s) involved is needed to clarify feelings and expectations. The use of effective and therapeutic communication skills are critical tools used by students for personal empowerment.

If at any time students feel that their safety is threatened or feel uncomfortable confronting behavior that is felt to be unprofessional, students are requested to describe the feelings to a faculty member or the Director of Nursing. Immediate reporting of concerns is needed so the problem can be dealt with in a timely manner.

Professional and Unprofessional Behaviors for WNC Nursing Students

Students are expected to adhere to the highest standards of professional conduct during all periods of attendance in classroom, college laboratories, and clinical affiliate sites. An important part of the student evaluation will be student relationships with patients, staff, peers, and faculty.

1. The following behaviors are expected of students:

- a. Show respect and civility in all forms of communication and interactions.
- b. Demonstrate responsibility and accountability for own decisions and actions, including seeking guidance and assistance upon recognition of personal limitations.
- c. Apply knowledge of legal and ethical professional standards in the provision of patient care, including recognition of all patient's rights.
- d. Respond appropriately to constructive criticism.

- e. Demonstrate punctuality in attendance at class, laboratory, testing, clinical sessions. Including preparedness for class and clinical assignments.
- f. Demonstrate self-direction and professional growth through utilization of available resources.
- g. Comply with instructions from faculty and clinical contact persons.
- h. Complete all written assignments and examinations independently and submit own work unless otherwise instructed to work collaboratively.
- i. Remain in clinical area during the assigned time interval and notify the nursing faculty and appropriate staff when leaving a clinical area.
- j. Adhere to and respect the procedures and protocols of clinical facilities and the WNC Nursing Program as outlined in the *Nursing Program Student Handbook*, the WNC Student Code of Conduct and the Nevada Systems of Higher Education (NSHE) student code of conduct.
- k. Perform administration of all medications, treatments and procedures in the presence of the faculty member or licensed nurse.

The following behaviors/conduct are considered unprofessional and may result in the imposition of an academic sanction including dismissal from the program and/or a disciplinary sanction pursuant to NSHE Code, Title 2, Chapter 10.

- a. Violating the *American Nurses Association Code of Ethics*.
- b. Inaccurately recording, falsifying or altering patient care records, and/or written assignments.
- c. Photocopying or printing copies of patient medical records and/or removing printed or electronic copies of patient records from the health care settings.
- d. Reporting to clinical and/or laboratory settings without proper preparation as defined in each course syllabus.
- e. Experiencing performance impairment due to lack of sleep, illness, influence of mind-altering drugs, illegal drugs and/or alcohol while in the classroom/laboratory environments or in the clinical area.
- f. Administering medications and/or treatments in a negligent manner or without presence of the faculty or licensed nurse, or without a valid medical order.
- g. Disclosing confidential information or knowledge concerning patients to individuals not involved with care.
- h. Practicing discrimination while rendering nursing care.
- i. Using profanity in the clinical area and/or using physical or verbal behaviors that could be interpreted as abuse.
- j. Repeat violation of dress codes.
- k. Falsifying of any information provided to the Nursing and Allied Health Office.
- l. Intentionally damaging, stealing, or removing materials or equipment from WNC or any clinical facility.
- m. Leaving the clinical area during assigned time without faculty permission.
- n. Cheating, plagiarizing, lying, or participating in any other form of academic dishonesty as described in the current *Western Nevada College Catalog* under Rules and Sanctions. This includes the use of written material from other work without citation and reference per American Psychological Association (APA)

guidelines. Any student found guilty of academic dishonesty will be disciplined. The disciplinary action may range from a warning to dismissal from the nursing program.

- o. Violating sexual harassment policies of WNC or health care organizations.
- p. Arriving late to clinical settings. (Refer to the clinical and lab requirements and policies).
- q. Acting in any way that serves to threaten or violate the rights and safety of other students, staff and faculty.
- r. Participating in uncivil behaviors in learning environments which interfere with a harmonious and cooperative learning atmosphere. Examples of such behaviors include but are not limited to:
 - Disruptions (texting, misuse of computers)
 - Side conversations during class time.
 - Arriving late or leaving early
 - Sleeping in class
 - Being argumentative
 - Monopolizing behaviors
 - Harassment activities

Nursing Curriculum – 71.5 Units

Prerequisite Courses **21 units**

CHEM 121 or BIOL 190/190L	4
MATH 120 or MATH 126	3
BIOL 223: A & P I	4
BIOL 224: A & P II	4
ENG 101: Composition I	3
PSY 101: Psychology	3

Note: BIOL 223 and 224 must be completed at the same college or university if the institution is not in the Nevada System of Higher Education.

Note: Statute of Limitations for science courses is five years by the date of application to the nursing program.

Note: Current CNA certification or completion of NURS 129 or 130 within five years of the date of application to the nursing program

Note: BIOL 251 must be successfully completed no later than the 4th semester of the nursing program.

Semester 1 Fall **14 units**

NURS 136: Foundations of Nursing Theory	3
NURS 137: Foundations of Nursing Laboratory	1
NURS 141: Foundations of Nursing Clinical	2
NURS 147: Health Assessment Theory	2
NURS 148: Health Assessment Laboratory	1
NURS 152: Foundations of Pharmacology in Nursing I	1
BIOL 251: General Microbiology	4

Semester 2 Spring **14 units**

NURS 149: Mental Health and Illness Theory	3
NURS 151: Mental Health and Illness Clinical	1
NURS 153: Foundations of Pharmacology in Nursing II	1
NURS 165: Medical Surgical Nursing I Theory	3
NURS 166: Medical Surgical Nursing I Laboratory	1
NURS 167: Medical Surgical Nursing I Clinical	2
ENG 102: Composition II	3

Semester 3 Fall **12 units**

NURS 270: Advanced Clinical Nursing I Theory	3
NURS 271: Advanced Clinical Nursing I Clinical	2
NURS 261: Nursing Care of the Family I Theory	2
NURS 262: Nursing Care of the Family I Lab/Clinical	1
NURS 156: Foundations of Pharmacology in Nursing III	1
US and Nevada Constitution	3

Semester 4 Spring **10.5 units**

NURS 261: Nursing Care of the Family II Theory	2
NURS 262: Nursing Care of the Family II Lab/Clinical	1
NURS 276: Advanced Clinical Nursing II Theory	2
NURS 277: Advanced Clinical Nursing II Clinical	2.5
NURS 284: ADN Manager of Care	2

Assessment Technologies Institute (ATI)

Integrated throughout the nursing program curricula are the Assessment Technologies Institute (ATI) student resources and products designed for student success in the nursing program and entry into nursing practice. Resources include review modules, skills videos, printed and eBooks, electronic medical record for documentation, assessment-driven comprehensive review program designed to enhance student licensure success and Swift River Clinical Replacement activities.

Cost per semester currently is \$764.37

Student ATI Assessment and Review Policy

The comprehensive ATI review program offers the following to students:

- An assessment-driven comprehensive review program designed to enhance student NCLEX® success.
- Multiple assessment and remediation activities. These include assessment indicators for academic success, critical thinking, and learning styles. Additionally, online tutorials, online practice tests, and proctored tests are provided and span major content areas in nursing. These ATI tools, in combination with the nursing program content, assist students to prepare effectively, helping to increase their confidence and familiarity with nursing content.
- ATI Orientation resources, such as the ATI Plan that can be accessed from “My ATI” tab. It is highly recommended that you spend time navigating through these orientation materials.

Review Modules/e-books

ATI provides Review Modules in eBook formats that include written and video materials in key content areas. Students are encouraged to use these modules to supplement course work and reading. Instructors may assign chapter reading either during a given course and/or as part of active learning/remediation following assessments.

Tutorials

ATI offers unique Tutorials that are designed to teach nursing students how to think like a nurse, how to take a nursing assessment, and how to make sound clinical decisions. Nurse Logic is an excellent way to learn the basics of how nurses think and make decisions. Learning System offers practice tests in specific nursing content areas that allow students to apply the valuable learning tools from Nurse Logic. Features such as a Hint Button, a Talking Glossary, and a Critical Thinking Guide are embedded throughout the Learning System tests to help students gain an understanding of the content.

Assessments

There are practice assessments available for students as well as standardized proctored assessments that may be scheduled during courses. These assessments will help the student to identify what they know as well as areas requiring remediation called Topics to Review.

Content Review and Active Learning/Remediation

Active Learning/Remediation is a process of reviewing content in an area that was not learned or not fully understood (as determined on an ATI assessment). Remediation tools are intended to help the student review important information to be successful in courses and on the NCLEX®. The student’s individual assessment report will contain a listing of the Topics to Review. It’s highly recommended to remediate using the Focused Review after completion of any practice/proctored tests, which contains links to ATI eBooks, media clips, and active learning templates. The instructor has online access to detailed information about the timing and duration of time spent in assessments, focused reviews, and tutorials by each student. Students can provide documentation that required ATI work was completed using the “My Transcript” feature under “My Results” of the ATI Student Home Page or by submitting written Remediation Templates as required.

SECTION II: GRADING SYSTEM

1. Students will receive a grade for each nursing course, which will be a letter grade or a pass/fail grade as outlined in each course syllabus. Most nursing courses are interrelated. For example, NURS 136, NURS 137 & NURS 141 are interrelated courses associated with Foundations of Nursing. NURS 136 is a theory course, NURS 137 is a laboratory course, and NURS 141 is a clinical course. Students must receive a grade of C (75%) or better in NURS 136 and a pass (P) grade in NURS 137 and 141 in order to progress in the program. **A grade of C- is not passing.** If the student is unsuccessful in any of these three courses, the entire sequence must be repeated. If a student withdraws from any of the three courses, the student is required to immediately withdraw from all Foundations of Nursing courses. Special circumstances may apply.
2. If a student has been evaluated as unsafe in the laboratory or clinical area, the student will be removed from the setting, and could be dismissed from the program. At a minimum, the student will receive an unsatisfactory (U) grade for the day.
3. Any student who withdraws from or who is not successful with a nursing course (clinical, laboratory and/or theory) will not be able to continue on in the nursing program. For example, if a student withdraws from NURS 136, the student will not be able to attend the associated laboratory and clinical courses (NURS 137 and NURS 141).
4. Students enrolled in co-requisite courses, such as NURS 152, will be allowed to continue in the course through the completion of the current semester.
5. Students who are dismissed from the nursing program for unsafe or unprofessional behavior will not be allowed to continue in any nursing course for the involved semester, unless granted approval for continuance in one of the standalone pharmacology courses.
6. Due to the progression of the program, incomplete grades must be removed before the start of the subsequent semester.
7. Students are responsible for tracking grades, clinical performance, as well as seeking assistance from faculty members.

Objective Criteria for Theory Grading:

1. A 75% overall average (C) must be maintained in all nursing courses.
2. Each student must earn an overall 75% average on examinations. Students who do not earn a 75% average on examinations will not be allowed to continue in the nursing program, and will receive the earned average of examinations as the grade for the course. **If a 75% average or higher is not earned on examinations, other course assignments, including quizzes, will not be averaged into the final grade.**
3. **Final grades and overall exam average will be calculated using the standard rounding at the tenth decimal.**
E.g. - 74.4 will be rounded to 74. E.g., 74.6 will be rounded to 75.

Note: No extra credit or bonus questions will be included on any examination in the Nursing Program curriculum.

Turn It In

Western Nevada College subscribes to the Turn It In program that assists students in scholarly writing and to determine if their written work is appropriately cited and referenced. The program also assists faculty to determine if a paper submitted by a student is free of plagiarism and is appropriately documented. Assistance regarding how to use the program is available through the library personnel. See individual syllabi for assignments requiring Turn It In submission. Following the exclusion of the bibliography/references and the notations in quotes, any paper observed to have greater than 30% plagiarism (or a similarity index >30%) will receive "0" credit and a personal advisement with

course faculty and a referral to <https://www.wnc.edu/academic-skills-center/> for tutoring on writing skills and scholarly writing.

Late Assignment Submission Policy

Assignments submitted after the published due date will not be accepted. Exception to the policy could occur if the instructor of record grants a variance due to a documented emergency situation prior to the deadline. A grade of “0” will be entered for the late assignment, which may result in failure of the course.

Attendance Policy

Students are expected to attend all course classes for which they have registered. An instructor may fail any student when the student has an excessive number of absences as identified in the course syllabus. In general, if a student is absent a number of classes greater than the number of units of the course, the absences may be considered excessive and the student could fail the course. Refer to the WNC attendance policy and individual course syllabi.

- Student absences will be noted by each faculty member to determine if there is an ongoing problem. Absences will be dealt with on a one-to-one basis between the student, and the instructor/s and if necessary, the Director of Nursing & Allied Health.
- If attendance by Zoom has been approved by the course faculty the student must keep their camera on and participate throughout the class session via chat and when called upon.

Performance Improvement Plans and Advisements of Unsatisfactory Performance

Performance Improvement Plan (PIP)

The goal of the Western Nevada College Nursing Program is to graduate competent, safe, and compassionate students. The nursing program employs standardized benchmarks for measuring student success and competence. When nursing student performance does not meet these benchmark standards, it is the duty of WNC faculty and students to work together to help students grow past any barriers and challenges impeding their learning. When problems with performance have been identified, the involved faculty and student will work together to create a Performance Improvement Plan, (see appendices G). Some examples of issues and complications that may qualify a student for being placed on a Performance Improvement Plan include, but are not limited to:

Unable to apply theory content to clinical situations
Unprepared for clinical
Tardiness
Failure to communicate tardiness, absence with faculty
Pattern of repeated errors
Repeated instances of turning work in late
Unsafe practice
Scope of practice issues/concerns
Unprofessional conduct
Does not follow directions
Personal life affecting performance
Course cumulative scores or exam scores of <75%

Being placed on a Performance Improvement Plan is not a punitive measure against students. It is a tool to help students and faculty identify barriers to student learning and develop a plan to grow past them. The Performance Improvement Plan is not necessarily synonymous with the Advisement of Unsatisfactory Performance, but failure to make corrective actions towards resolving the Performance Improvement Plan may result in either a revision of the plan or the student receiving an Advisement of Unsatisfactory Performance (otherwise known as a “U”).

Advisement of Unsatisfactory Performance

An Advisement of Unsatisfactory Performance (See Appendix H) is given to students under two circumstances: when students fail to meet program standards after the implementation of a Performance Improvement Plan (PIP) and/or

when an issue arises that faculty deem serious enough to warrant giving the student a unsatisfactory (“U”) regardless of whether or not a PIP is in place. Examples that may qualify a student to receive a “U” include, but are not limited to:

- Unsafe nursing practice
- Unethical behavior
- Any form of harassment
- Cheating, plagiarism, dishonest conduct
- Inappropriate responses to feedback and criticism
- Being unprepared for clinicals (particularly for students who have been sufficiently informed)

First year nursing students may receive three “U”s per academic semester before further disciplinary action, up to expulsion from the nursing, program may occur. Second year students may receive up to two “U”s per semester.

Some instances may result in the student being placed on a Performance Improvement Plan and given an Advisement of Unsatisfactory Performance (a “U”).

The signed form will be placed in the student file. Students who have received a PIP will be reviewed monthly at nursing faculty meetings.

Grade Distribution in Nursing Courses:

Grade	GPA	Grade Range
Passing:		
A	4.0	93 - 100
A-	3.7	90 - 92
B+	3.3	87 - 89 .
B	3.0	83. - 86
B-	2.7	80 - 82
C+	2.3	78 - 79
C	2.0	75 - 77
Not Passing		
C-	1.7	70 - 74
D	1.0	65 - 69
F	0.0	↓ 65

Student Clinical Performance Evaluation Tool

The WNC nursing faculty utilizes clinical evaluation tools to evaluate student progress throughout the program. These tools are designed to assess progression towards achievement of nursing program student learning outcomes and related course objectives. The process for evaluation of clinical performance is explained in course syllabi and Student Clinical Performance Evaluation Tool.

Many courses include a clinical component and a theory, laboratory, or simulation component. Any course with a clinical component, the clinical portion will be graded under the criterion within the Clinical Evaluation Tool. The Student Clinical Performance Evaluation Tool is contained in the handbook and the clinical course modules in Canvas.

SECTION III:

CLINICAL AND LABORATORY COMPONENT REQUIREMENTS AND POLICIES

Students in the Nursing Program are provided clinical learning experiences at a variety of healthcare settings. The contracts between the clinical learning environments and Western Nevada College identify specific compliance information which must be monitored by the Office of Nursing & Allied Health and must be available to each clinical learning environment as requested. Complio is the third party the WNC Nursing Program partners with for all background screening, drug screening, immunization and health record tracking, and clinical placement matching. Students are responsible for the associated fees.

All students enrolled in the Nursing Program must continue to comply **at all times** with health and safety guidelines related to immunizations, required tests, medical insurance, and current CPR certification. Students are responsible for tracking and maintaining the published requirements, including submission of yearly TB testing results, CPR certification, major medical insurance, and completion of immunization administered as a series through Complio. This verification process could take up to 72 hours.

Students will be fully accepted into the nursing program contingent upon receipt of information described in paragraphs numbered 1-3 below.

Students who do not submit the required clinical information by the date identified at the 1st Orientation Program for newly admitted students will be removed from the program acceptance list and a student with alternate status will be offered a place in the program.

It is the responsibility of the student to maintain compliance with health insurance, health screenings, required immunizations, and CPR certification while enrolled in the program.

If any student is not in compliance on the day of a laboratory or clinical experience, the student will not be allowed to attend the learning experiences and, when applicable, will receive a U grade for each of the missed experiences. **There are no exceptions to this policy.**

Adherence to the following policies is required of all students:

1. Health Insurance

All students are required to carry major medical health insurance while enrolled in the nursing program. It is the responsibility of students to obtain and pay for this insurance, as well as to understand the benefits and limitations of any insurance policy they maintain or is maintained on their behalf. Students are encouraged to carry their major medical health insurance card when participating in laboratory and clinical experiences.

2. Physical Examination, Required Screenings, Immunizations, and CPR Certification

In order to be admitted and retained in the nursing program, the student must meet the contractual requirements of clinical sites and be suitable for performing the work required in the program to help assure the health and safety of the public served. The nursing program reserves the right to deny entrance to students with incomplete and/or unacceptable health reports.

3. Physical Examination

All students admitted into the nursing program must submit a signed Physical Examination Form from a physician, nurse practitioner or other qualified health care provider. The form is to be uploaded to the student's profile in Complio.

4. Required Screenings, Immunizations, CPR Certification

All students admitted into the nursing program must be compliant in Complio by the first day of the semester and must maintain compliance through their enrollment in the nursing program.

Yearly tuberculin skin test results or results of a QuantiFERON TB Gold Test (QFT-G) tuberculin blood test. A two-step tuberculin skin test is required if yearly TB testing has not occurred. The requirements of the clinical site will be followed in the event a student has a positive reaction to the TB skin test.

- Proof of immunity for measles, mumps, and rubella (2 doses of MMR) or titers for rubella, rubeola, and mumps.
- Proof of tetanus vaccine immunization within the past 10 years. The immunization must be **TDAP or DTAP**.
- Proof of having two or more doses of the Hepatitis B vaccine series at the time of admission. Students are required to complete the Hepatitis B vaccine series prior to the start of the 2nd semester of the nursing program.
- Proof of having received two Varicella (chicken pox) vaccines.
- Students are required to show proof of compliance with both the influenza vaccine and COVID-19 vaccination or booster requirements of the clinical sites.
- Proof of current CPR certification through the **American Heart Association** – Basic Life Support (BLS) Healthcare Provider only.
- Proof of holding major medical insurance (**card or letter from insurance company required**).
- Proof of an acceptable drug screen test result provided by Complio.
- Exemption waivers may be submitted for consideration.

All documentation must be uploaded directly to the student profile in Complio. Nursing faculty will not accept health information submitted by students.

5. **Background Check**

An acceptable background check is required for admission into the nursing program. Information regarding how to build your student profile in Complio will be discussed with first year students during the orientation in June.

Students are advised that an acceptable background check through Complio does not guarantee the background check conducted by state boards of nursing at the time of application for licensure will be found acceptable.

6. **Drug Screen**

A clear drug screen is required prior to admission into the nursing program. Requisitions can be downloaded in Complio, please be advised that the requisitions are time sensitive so do not download them until ready to have completed.

8. Uniform Dress Code Policy

- Required uniform must be purchased through *Uniformity*, (located in N. Carson City), and consists of:
Royal blue pants
Royal blue scrub top with college emblem
White laboratory coat with college emblem
Neutral hose, white or black socks

Optional: Black or White vest purchased from Uniformity with the WNC logo will be permitted in open lab, lab and clinicals.

- Shoes must be of white or black, cover the entire foot and be free of obvious logos. They should be made of a **non-penetrable material**. Shoes selected are to be worn for laboratory and clinical experiences exclusively. Clogs, platform and canvas shoes (i.e. Vans) are not allowed for reasons of safety.
- A WNC nursing photo name tag, with first name/last initial and educational credentials, is to be visibly displayed at chest level, and is required to be worn at all times when students are on **laboratory or clinical units**. Some clinical sites will require an additional identification badge while at the facility. Students must obtain from student services a nursing student ID to wear during all lab and clinical experiences annually. Nevada State Board of Nursing requires a first name and last initial along with a picture and title. A badge holder fastened with a clip is required. **No lanyards are allowed for reasons of safety.**
- The nursing uniform is to be worn during laboratory and clinical learning experiences unless otherwise stipulated by the faculty member. Students will be informed in course syllabi of exceptions to the usual nursing uniform. A solid white long sleeve shirt may be worn under the royal blue scrub top. Uniforms are to be washed after each laboratory and clinical experience.
- Appropriate business-like apparel and photo nametag are to be worn for community clinical experiences with a laboratory coat unless otherwise specified in the syllabus.
- Hair is to be clean, appropriately arranged, away from the face so as not to interfere with the safe delivery of patient care. Hair longer than the collar must be contained in a bun, twist, short ponytail or short braid. Natural looking hair color is required. Beards and/or mustaches, if worn, must be neatly trimmed and clean. Facial hair is not to interfere with the proper fit of protective masks and respirators.
- The skin is to be clean and free of communicable diseases and offensive odors. Clean and proper hygiene is expected, including use deodorant/antiperspirant daily. Students will not smell of cigarette smoke while in uniform in the clinical area.
- Nails are to be clean and short (not visible from the anterior aspect of the palm). Artificial nails are prohibited.
- The use of perfumes, colognes or scented body creams is prohibited during clinical agency experiences.
- Students may wear a plain ring that is free of stones. A ring that is worn must not present a danger to ripping gloves or injuring of skin of patients. Other jewelry is limited to small post earrings. Necklaces and bracelets of any kind are prohibited. Dangling, clip-on or hoop earrings are prohibited for safety reasons. Body and facial piercing are not allowed in clinical experience and must be removed or plugged with clear or nude appliance.
- Clinical facility policies regarding tattoos will be followed when students are on clinical rotations. Students are discouraged from obtaining a tattoo that is visible, such as on the head, neck, arm and wrist while enrolled in the program. Students must be in compliance with WNC dress code at all times. If a student is not in compliance with the dress code, s/he will be considered to be in violation of the code and may not participate in clinical experiences. **Failure to adhere to the program dress code will result in the student being dismissed from the laboratory or clinical setting. The student will earn a “U” grade for the day.**
- Students are required to bring the following equipment to all laboratory and clinical sessions:

Stethoscope
Bandage scissors
Penlight
Watch with second hand or of digital design noting seconds
Skills check-list (provided by the program)

Supervised Activities for First- and Second-Year Nursing Students

- ***FIRST TIME*** performance of any nursing skill in the clinical setting must be carried out under the supervision of the faculty member.
- ***THERE AFTER*** medication administration, treatments and procedures are required to be carried out in the presence of a faculty member or registered nurse.
- It is the student's responsibility to notify the faculty member when they need assistance at the clinical site.

Mandatory Nursing Program Orientation Policy

Communication regarding program requirements is necessary to help insure student success in the Nursing Program. Orientation sessions are scheduled as outlined below.

Students are required to attend the following **mandatory** orientation sessions. Failure to attend the mandatory orientation sessions will result in the student being dropped from the Nursing Program. Exceptions to this policy may be granted by the Director in the event of an emergency.

- **New Student First Mandatory Orientation: Session One.**
Session is usually scheduled during the 2nd or 3rd week of June. Students will be informed **of the date and time on the acceptance letter.**
- **New Student 2nd Mandatory Orientation: Session Two**
Session is scheduled for one day during the week prior to the start of classes in August. Students will be informed of the specific date during the 1st year mandatory orientation.
- **Clinical Mandatory Orientations**
All students will be required to complete in person and online learning activities specific to the clinical organization they are assigned to for each clinical course throughout the nursing program.
- **Second Year, Mandatory Orientation:**
The orientation session for 3rd semester generally occurs following completion of the final 2nd semester course examination. 4th semester orientation generally occurs following completion of the final 3rd semester course examination – this is in person!

Theory and Laboratory Tardiness/Absence Policy

Students are required to notify the instructor if tardiness is anticipated. Tardiness may result in scheduling difficulties and therefore is not tolerated or safe. Habitual tardiness (more than three (3) times in a semester) could result in failure to meet course objectives.

Clinical Tardiness Policy Leave

Students are expected to be at the designated clinical site and building location at the published time. Students are required to notify the clinical instructor via phone prior to the start of a clinical experience. Failure to notify the instructor may result in a clinical unsatisfactory (U) grade.

Absence from Clinical Experiences Policy

Students are expected to attend all scheduled clinical experiences unless due to illness or emergency situations. **In the event that the student is unable to attend a clinical experience, students are expected to notify the instructor at least 60 minutes prior to the designated start time. Non-notification may result in a clinical U grade.**

Replacement clinical experiences are not guaranteed and may result in not being successful in clinical and progression in the nursing program. Under the circumstance of absence, a student who has missed a clinical experience is responsible to work with the faculty member to determine appropriate make-up experiences.

Incident Report Policy

When a student makes an error of omission or commission while providing patient care and the error requires that an incident report be placed on file at the health care facility, the following procedure will be implemented:

1. When the student becomes aware of an error, the student will **immediately** inform the faculty.
2. As soon as the error has been noted, the student and clinical faculty will notify the nurse in charge of the unit where the error occurred.
3. The clinical faculty member will assist the student in completing the required health care facility incident report and will also complete the agency's electronic Incident Report Form as directed by the facility representative.
4. The clinical faculty will notify the Director of Nursing as soon as possible concerning the incident report. The clinical instructor will complete a WNC Incident/Accident Form (See Appendix F) concerning the incident. It will clearly document the nature of the error, the circumstances surrounding it, and the corrective action taken by the faculty regarding the student.
5. The incident will also be reflected appropriately on the student's clinical evaluation form.
6. Should the student be injured during performance of lab/clinical experiences the faculty must be notified immediately, an incident report completed, and the student evaluated by a health care provider. A description of the incident will be given to the Director of Nursing.

Protocol in the Event of Accident at the Health Care Facility

Should a student experience an accident, such as exposure to blood-borne pathogens or back injury while at a health care facility, the student will immediately report the accident to the clinical faculty member. The student will be advised to receive appropriate follow up care by his/her health care provider. The health care facility report regarding the injury must be completed prior to leaving the facility.

Students are required to complete the Exposure to Blood-borne Pathogens Form for blood-borne pathogen exposure, or the Clinical Related Incident/Accident Statement Form for other types of injuries. These forms are located in Appendix D and Appendix F, respectively. The appropriate form should be completed within two days and submitted to the Office of Nursing and Allied Health, where it will be placed in the student's permanent file.

Students are responsible for expenses incurred (i.e. examination, treatment) as a result of injury from their own actions during a clinical experience. Any expense from injury to a student as a result of the health institution's environment (e.g., faulty equipment) is usually the responsibility of the institution.

Health Insurance Portability and Accountability Act (HIPAA) Regulations

Nursing students have access to health information of patients encountered during clinical experiences. This privilege requires students maintain the privacy and confidentiality of all patients. The Health Insurance Portability and Accountability Act (HIPAA) mandates regulations designed to insure patient privacy that all health care providers must follow. Students must comply with HIPAA regulations and all procedures developed for its implementation. Violation of HIPAA may result in the imposition of an academic sanction including dismissal from the nursing program and/or a disciplinary sanction pursuant to NSHE Code, Title 2, Chapter 10.

Violation of these rules could result in significant civil and criminal penalties for students and the college, particularly if an improper disclosure of information is done knowingly. Students will receive information regarding HIPAA regulations from the college and health care organizations. Permission to disclose health information to anyone other than the patient requires the patient's written authorization except in the following situations:

- Employees or supervisors who need the information to perform their duties
- Medical providers for treatment purposes
- Insurance companies to obtain payment for services

Confidentiality of Patient Records

Students are expected to adhere to the requirements of professional behavior as outlined in the *Nursing Program Student Handbook*. Under certain circumstances, and with the clinical instructor's knowledge and approval by the clinical site, students may be granted permission to review a former patient's record in the Medical Records Department of the affiliating agency for the purpose of completing a nursing care plan or like assignment. Every effort must be made on the part of the student to assure the confidentiality of the patient's medical record is maintained. Patient information may not be removed, copied, photographed or printed from the clinical facility.

Confidentiality of Patient Information

Information regarding patients and the healthcare environment is to be kept confidential and is only discussed during pre-and/or post-conferences. The disclosure of confidential information regarding patients or health care environments may result in the imposition of an academic sanction including dismissal from the nursing program and/or a disciplinary sanction pursuant to NSHE Code, Title 2, Chapter 10.

SECTION IV PROGRESSION AND READMISSION POLICIES

Nursing Program Progression Policy

A student will progress in the nursing program when he/she:

1. Maintains a minimum of a C (not C-) average in all courses that are graded with a letter grade. A grade of C represents a minimum of a 75% average.
2. Passes all nursing courses during a designated semester.
3. Demonstrates satisfactory performance of designated skills.
4. Earns a letter grade of C or better or a passing grade (S) in all laboratory and clinical courses.
5. Passes math examinations each semester with a grade of 90%.
6. Is in compliance with college policies, and professional standards of nursing, including the ANA Code of Ethics and the Nevada State Board of Nursing.
7. Compliance of required immunizations, TB testing, health insurance, background check, drug screen, and current CPR certification.
8. Adheres to all policies in the *Nursing Program Student Handbook*.

Nursing Program Readmission Policy:

REQUEST FOR READMISSION - Nursing Program
Admissions and Records
Western Nevada College
2201 West College Parkway, Carson City, NV 89703
775-445-3277, admissions.records@wnc.edu

1. At the conclusion of each semester of study, the Nursing Program Faculty Committee discusses students who failed or withdrew from courses during the semester. The faculty acknowledges the responsibility to readmit students, who in their judgment satisfy the requirements of scholarship and professional suitability for nursing. The faculty reserves the right to deny readmission based on a history of unprofessional conduct which violates the ANA Code of Ethics.
2. A student who started the nursing program may be readmitted one time following a withdrawal/failure. A written request for an exception to the policy for such reasons as medical and military will be considered by Nursing Program faculty. Students who are eligible to be considered for readmission into the nursing program will be admitted using a point system and, on a space, available basis.
3. Students eligible for readmission into the Nursing Program will complete and submit the **Request for Readmission Form to the Nursing & Allied Health and WNC Admissions and Records offices.** (Appendix M) The form, will address the following information:
 - Date by which the request for readmission must be received.
 - Description of the challenge examinations that must be completed with a grade of 75% or better for the theory portion and a Pass (P) grade for the skill evaluations.
 - Cost of readmission testing (\$30 for the theory evaluation and \$120 for the skill evaluation). Payment for the challenge tests is submitted to Business Office prior to scheduling of readmission testing.
4. Students will be required to pass both a written competency exam and a hands-on skills performance evaluation demonstrating competency prior learning for re-entry into the nursing program.
 - A score of 75% or more is required for the competency evaluation and a passing grade is required for the selected skill evaluation, in order to be readmitted into the nursing program.
 - Students who withdrew from or who failed a course or courses that are related (e.g. NURS 136, 137 & 141) will be required to repeat all courses in the sequence.
 - Students may choose to repeat all courses, including those previously passed, for the semester of readmission.

- Students failing either component of the readmission evaluation may choose to reapply for the nursing program with the next incoming cohort and will be held to current admission requirements. This would be considered the one-time readmission allowable.
 - The statute of limitations for nursing (NURS) courses is two years. Nursing courses taken more than 2 years prior to reapplication will be required to be repeated.
5. Students seeking readmission into the nursing program will be required to update all requirements through Complio (CPR, immunizations, health insurance, etc.).

REQUEST FOR READMISSION - Nursing Program
Western Nevada College, Admissions and Records
2201 West College Parkway, Carson City, NV 89703
 775-445-3277, admissions.records@wnc.edu

READMISSION DEADLINES:

- FALL SEMESTER (3RD): **JULY 1ST**
- SPRING SEMESTER (2ND & 4TH): **DECEMBER 1ST**

Name: _____

Student ID Number: _____
 (Last) (First) (MI)

E-mail: _____ Phone: _____

Semester of Readmission Request: 2nd Semester 3rd Semester 4th Semester

I accept responsibility for working with the Nursing Division Office on all necessary competency exams and payments, and if approved authorize that my degree program be changed to Associate of Applied Science – Nursing.

Student Signature _____ Date _____

Courses Passed within Semester Seeking Readmission:

A score of 75% or more is required for the competency evaluation and a passing grade is required for the selected skill evaluation, in order to be readmitted into the nursing program.

Course (e.g. NURS 136)

Nursing Division Review:

_____ Eligible for Readmission
 _____ Exam Fee Paid
 _____ Competency & Skills Evaluation Passed

Approved Denied

Director of Nursing: _____ Date: _____

For Admissions & Records Office Use Only:

_____ Approved
 _____ Denied Reason for Denial: _____

Processed by: _____ Date: _____

Western Nevada College does not discriminate on the basis of race, color, national origin, sex, disability, or age in its programs and activities and provides equal access to the Boy Scouts and other designated youth groups. The following person has been designated to handle inquiries regarding the non-discrimination policies: Title IX Coordinator & Director of Human Resources; Western Nevada College, 2201 West College Parkway, Carson City, NV 89703, (775) 445-4235 <https://wnc.edu/human-resources/index.php> AND/OR U.S. Department of Education, Office of Civil Rights 1-800-421-3481 ocr@ed.gov.

SECTION V

STUDENT POLICIES

Changes in Class Format

Any class that is being conducted onsite may have to be switched to remote or online at any point during the semester based on public health concerns as directed by the State of Nevada.

Computer Literacy Policy

The nursing program utilizes web-based technology and requires students to submit paperwork using computer technology. Students, therefore, must have computer word-processing skills and access to computer stations with internet access, and active email. WNC does have laptop computers available for check-out, please see the WNC library for assistance with this.

Nursing Program Grievance Policy

A following process is in place for nursing students to submit an official grievance/complaint:

STEP 1:

Discuss the grievance with the faculty involved within five (5) academic days following the incident/occurrence. If the issue is not resolved, then:

STEP 2:

Complete and submit grievance information on the Nursing Program Grievance Form (See Appendix A). The completed form must be submitted to the Director of Nursing within one week following Step 1. The Director will schedule a meeting within five (5) academic days with the involved student and faculty member(s) in an attempt to resolve the issue. (In the event the Director of Nursing is off campus, the time frame for appeal will commence when the Director returns. The Director will render a decision in writing to the involved parties within three (3) academic days. The Director reserves the right to consult with nursing program faculty during Step 2. The decision of the director is the final decision for the nursing program.

Appeal

A student may appeal the director's decision by following the WNC Student Grievance Procedure identified in the college catalog. A grievance must be filed in writing to the Vice President of Academic and Student Affairs within 30 instructional days of the alleged infraction.

Academic Probation Policy

Academic probation means that a student may continue on in the nursing program under special circumstances. Academic probation occurs when, in the judgment of the faculty, the student has jeopardized his/her future in the nursing program based on, but not limited to, issues of plagiarism, dishonest practices, unprofessional behaviors or marginal performance. See Performance Improvement Plan.

Use of Electronic Devices

The following guidelines exist for the use of personal electronic devices:

- Electronic devices, including cell phones, are to be silenced during all theory, laboratory and clinical experiences.
- Electronic devices, including smart watches, must also be silenced during examinations and stored in an inaccessible area.
- Cell phones may only be used during scheduled breaks when during classes or participating in clinical experiences.
- Students may use personal cell phone to contact the faculty member during clinical time, however this must be conducted in a non-patient area!
- Computers may be used to document theory notes during class time.
- In the event of an emergency, the administrative assistant may be contacted to reach a student at 775-445-3294.

Students who do not comply with the electronic device regulations in the theory, laboratory or clinical setting may be dismissed from the learning environment. At the discretion of the nursing faculty, students may receive a warning, Performance Improvement Plan, and/or a "U".

Use of Copier and Printers

Photocopying services for students are available at the college libraries. Printers are available in the libraries and computer labs.

Social Media

Nurses and nursing students have an obligation to understand the nature, benefits and consequences of participating in social networking of all types. Online content and behavior have the potential to enhance or undermine not only the individual nurse's career but also the nursing profession.

ANA's Principles for Social Networking

1. Nurses must not transmit or place online individually identifiable patient information.
2. Nurses must observe ethically prescribed professional patient-nurse boundaries.
3. Nurses should understand that patients, colleagues, institutions, and employers may view postings.
4. Nurses should take advantage of privacy settings and seek separate personal and professional information online.
5. Nurses should bring content that could harm a patient's privacy rights, or welfare to the attention of appropriate authorities.
6. Nurses should participate in developing institutional policies governing online conduct.

Tips to Follow to Avoid Problems

1. Remember that standards of professionalism are the same online as in any other circumstance.
2. Do not share or post information or photos gained through nurse-patient relationships.
3. Maintain professional boundaries in the use of electronic media. Online contact with patients blurs this boundary.
4. Do not make disparaging remarks about patients, employers or co-workers, even if they are not identified.
5. Do not take photos or videos of patients on personal devices, including cell phones.
6. Promptly report a breach of confidentiality or privacy.

Math Requirement and Medication Administration Policy

Accurate dosage calculation is considered to be a critical skill in the nursing program.

Therefore, prior to acceptance into the nursing program, it is required that students take Math 96, 126, or higher to acquire a background in math suitable for professional nursing practice. Throughout the program, dosage calculations will be encountered in patient care situations. To prepare students to calculate medication dosages competently and safely, the following policy has been adopted:

- Students will be tested for math competency at the beginning of each semester in ATI or Canvas. Students must achieve a 90% on the test content. If the student passes with the required percentage, the student may administer medications in the clinical setting under the direction of the clinical instructor.
- Students achieving less than 90% will have one subsequent opportunity to test. In addition, the student is advised to seek remediation in math tutoring offered by the academic coaches available through library services.
- Students with less than 90% on the 2nd exam will be placed on Performance Improvement Plan (PIP). In this case, the student will not be permitted to administer medications in the clinical setting until the performance criteria in the PIP are met. If the student does not meet the expectations detailed in their Performance Improvement Plan, the student will not be able to continue in the nursing program.

Professional Behavior Policy

Faculty members set and maintain standards of classroom behavior appropriate to the discipline and method of teaching. Students may not engage in any activity that the instructor deems disruptive or counterproductive to the goals of the class. Instructors have the right to remove offending students from the classroom. Disruptive behavior may result in the imposition of an academic sanction including dismissal from the nursing program and/or a disciplinary sanction pursuant to NSHE Code, Title 2 - Chapter 10. Students are also required to maintain professional behaviors when interacting with nursing program staff, college employees and peers.

Students are also expected to be present before the start of all theory classes after which time the doors will be closed. Students who are late for class will only be allowed entry into the classroom following the assigned break.

Nursing Laboratory Policy

Students are required to attend all scheduled laboratory sessions and are expected to practice required skills in the nursing laboratory setting. Students must demonstrate competency in all required skill(s) prior to performing them at the clinical setting. A skills list will be maintained by the student.

WNC maintains state-of-the-art campus laboratories. The laboratory is available for student practice of assessment and intervention skills. The Laboratory Guidelines and Responsibilities policy will be reviewed with the students on the first lab day, and acknowledgement signed in the Canvas course.

- A laboratory sign-in sheet will be available to document practice time.
- All necessary lab equipment is provided and **must** remain in the laboratory.
- If faculty feels that a student needs to have more practice on previously learned skills, the faculty will complete the **Nursing Laboratory Referral Form** (see Appendix B) and give the form to the campus laboratory staff member. The student will be required to complete this request by the designated date written by the referring faculty.
- **Food and drink are prohibited** in the nursing laboratory area due to the sensitive nature of the equipment and the requirement to follow OSHA requirements. No exceptions.
- Students will follow the dress code when in the nursing laboratory, including when the student is in the laboratory for practice.
- Students are responsible for lab cleanliness, equipment and supply relocation after laboratory use. The faculty member will release students from the laboratory after it has been determined that the laboratory space is ready for use by another group.

Class Schedule Change

Requests for change in a clinical schedule/rotation, except for makeup clinical experiences, must be made through the Office of Nursing and Allied Health. Students are not to request changes in schedules through a faculty member.

Student Illness, Injury, and Hospitalization Policy

A signed Release Statement is required from a health care provider before a student can attend any nursing theory, laboratory or clinical experience in the following situations:

- Student illness/injury lasting for more than 3 consecutive days.
- Treatment or hospitalization requiring medical intervention.
- Childbirth or miscarriage events.

The **Release Statement** is to be addressed to the Director of Nursing and Allied Health and must state the student is able to perform nursing activities in a manner that will neither harm the student nor compromise patient safety. The Release Statement must also clearly state restrictions that are in place. E.g. Student is not to lift more than five pounds for the next month. The student is to make two (2) copies of the **Release Statement**. The original statement is to be submitted to the Director of Nursing and Allied Health for placement in the student's permanent file. The second copy will be shared with appropriate faculty members after the statement is read and approved by the director. **Elective, non-emergent surgeries that could interfere with performance and learning in the class or clinical site should be scheduled outside of the academic year.**

The student is responsible for immediately reporting a personal injury that occurs in the college laboratory or at a clinical site. The student is responsible for seeking medical attention. If the injury is of such a nature that the student could not provide safe patient care, or might further aggravate the injury by returning to laboratory or the clinical area within 24 hours of the injury, a physician's **Release Statement** and approval of the faculty will be required before the student will be readmitted to class or the clinical area. Violation of the Student Illness, Injury, and Hospitalization Policy may result in the imposition of an academic sanction including dismissal from the nursing program.

Nursing Student Pregnancy Policy

A student wishing to continue her nursing education while pregnant must present a written **Release Statement** from a physician, advanced practice nurse, or certified nurse midwife that is addressed to the Director. The **Release Statement** must verify that the student is able to perform nursing activities in a manner that will neither harm the student nor compromise patient safety. The **Release Statement** must also clearly state any restrictions that are in place. E.g. Student is not to lift more than five pounds for the next month.

Because there are a limited number of clinical absences that can be made up in any semester, all pregnant students must

make an appointment with the Director of Nursing and Allied Health for the semester they anticipate delivery to discuss these limitations. This appointment is to be made prior to enrollment in the courses.

Review of Examinations Policy

Students will have one week from the time they receive their examination score to request a review of a particular test. A request for a test review must be made via e-mail. Following the request for the test review, faculty will schedule a time and place for the review. In most cases, this time will not exceed one week from the date of request for review. **Students will not be afforded the opportunity to review a test if they have not requested the review within the one-week time frame stated above.**

Disclosure of Exposure to Potential Health Risks and Waiver of Liability Policy

During the course of the clinical experiences of the nursing program at WNC, students may come into contact with diseases, medicines, treatments, and equipment which are potentially hazardous to the student's health, or to the health of unborn fetuses, in the case of pregnant students. Examples of potential hazards to which exposure may occur include, but are not limited to bacterial, mycotic, and viral diseases as well as radioactive materials and x-ray machines. Although reasonable efforts are made to avoid and minimize these risks, the exact probability of exposure to these potential hazards is not known. The student may be required to enter areas where access is restricted due to the storage, transfer, or use of radiation sources.

Prior to experiences in these areas, students will be given appropriate instruction in precautions and protective devices, as well as problems that may be encountered in these areas. Students will be given instruction in infection control procedures, and other techniques, for minimizing the risks of exposure to potential hazards. Latex free gloves are used in the nursing laboratories and are available on nursing units. Students are expected to care for all assigned patients once instruction regarding infection control procedures and exposure to potential hazards is provided. Students are requested to sign the *Waiver of Liability Form* (Appendix L) and submit to 1st or 2nd level faculty members as appropriate.

Blood Borne Pathogen Exposure and Prevention Policy

The Nursing and Allied Health Division has developed a *Blood borne Pathogen Exposure and Prevention Policy* to that is in compliance with the Occupational Safety and Health Administration (OSHA) Standards. The policy is intended to provide direction to students and faculty to help prevent exposure to blood-borne pathogens and guidance should such exposure occur. (See Appendix C for policy and Appendix D for form).

Impairment Policy for Nursing Students

Nursing students are representatives of the WNC during their nursing studies and clinical experiences. Accordingly, the Nursing Program faculty recognizes and respond to inappropriate behaviors and performance, which may be attributed to substance abuse and/or emotional illness. **(See Appendix E for Impairment Policy).**

Tobacco Use Policy

Nursing students are prohibited from smoking or chewing tobacco while in uniform at clinical sites. All WNC campuses are smoke and vape free environments.

Procedure Followed to Communicate Change in Nursing Program Policies

Occasionally there is a need to add, delete, or change a nursing program policy. Should this occur, the following protocols will be followed:

1. Students will be informed of changes in program policies via email sent from the NAH Office.
2. Students will be informed of the change through verbal and email notification in selected theory courses.
3. The change will be immediately added to the *Nursing Program Student Handbook* on the Nursing & Allied Health Division website.

SECTION VI – GOVERNANCE AND CLUBS

Governance within the Nursing Program

Student input **into program governance** occurs in the following ways:

1. Submission of the End of First Year Survey and the End of Program Surveys
The surveys are designed to elicit student opinions regarding quality of the educational experience, with suggestions for improvements. The surveys are administered electronically at the completion of the 2nd and 4th semesters of the Nursing Program.
2. Student and Faculty Governance Committee (separate committees for 1st and 2nd year students).

Purposes of the committees include but are not limited to:

- Identification of concerns/issues experienced by students.
- Identification of problems/issues experienced by nursing faculty as they relate to student conduct and learning environments.
- Discussion of new ideas brought forth by students or faculty.

Membership of the committee includes but is not limited to:

- One student representative from each clinical group.
- Director of Nursing and Allied Health
- Nursing Program 1st and 2nd Year Lead Faculty

Note:

Minutes of all meetings will be recorded. The names of students or faculty members bring agenda items and/or participating in discussion will not be identified in the minutes. Upon approval of the minutes by students and faculty members, the minutes will be distributed to all students and faculty.

3. **Use of mail box to submit concerns**
Students will have the opportunity to anonymously submit concerns to the Nursing Program by using the mail box situated outside of the nursing office on the first floor of the Cedar Building.
4. **Request to be placed on the following committee agendas:**
Student/s may request to be placed on the agenda of the Nursing Program Faculty Committee, Level I and Level II faculty meetings or any of the three nursing program subcommittees (Faculty and Student Committee, Resource Committee, and Outcomes Committee).
5. **Request an appointment with the Director of Nursing & Allied Health.**
Students may request an appointment with the Director through the Nursing Program Administrative Assistant.
6. **Participate on Ad Hoc Nursing Committees as the need arises.**
Ad hoc committees are organized on an as needed basis to address issues of interest to students and/or faculty that are not addressed through the usual venues.

Nursing Program Clubs

WNC 2nd Year Nursing Club

All second-year students are members of the **Second Year Nursing Club**, which is governed by its officers, which include a president, vice-president, secretary, treasurer, fundraising chair and Fallon liaison. The club is assigned a faculty advisor who guides the club to function under the required guidelines of **Associated Students of Western Nevada** (ASWN). Guidelines include an annual submission of club by-laws and position descriptions of the officers during the month of September. Kathy Cocking serves as the club advisor and Heather Reardon serves as co-advisor.

The purpose of the nursing clubs is to provide an opportunity for all nursing students to:

- Identify class goals
- Identify class service projects.
- Identify and discuss concerns and questions related to their learning experiences.
- Decide on student activities and fundraisers.
- Assist the Director and faculty to plan and organize the Pinning Ceremony.
- Raise funds to finance end of program activities

National Student Nurses Association (NSNA)

All currently enrolled nursing students as well as pre-nursing students at WNC have the opportunity for membership in the WNC **National Student Nurses Association**. The organization, with a membership of 60,000 students nationwide, serves to mentor the professional development of future registered nurses and to facilitate their entrance into the profession by providing educational resources, leadership opportunities and career guidance. Students are elected to the offices of President, Vice President, Secretary and Treasurer. Lisa Dunkelberg serves as the club advisor and Irene Jen Schiller serves as co-advisor.

WNC Club - Associated Students of Western Nevada

All students enrolled at the college are members of the Associated Students of Western Nevada (ASWN). The association serves as a representative body for the students at WNC to address student concerns and create awareness of WNC student needs. Student representatives are located in the Joe Dini Student Center.

Note: A nursing student may hold one officer position in sanctioned WNC ASWN clubs, which include the nursing clubs.

SECTION VII

COLLEGE SUPPORT SERVICES

Support Services for Students at WNC

- | | | |
|---------------------------------|--------------|---------------------|
| 1. Academic Advising and Access | 775-445-3267 | Fallon 775-445-3379 |
| 2. WNC Online Bookstore | 307-426-5536 | |
| 3. Library – Carson City | 775-445-3229 | Fallon 775-445-3392 |
| 4. Computing Services | 775-445-4290 | |
| 5. Child Development center | 775-445-4262 | |
| 6. Disability Support Services | 775-445-4459 | |
| 7. Financial Assistance | 775-445-3264 | |
| 8. Admissions & Records | 775-445-3264 | |
| 9. Foundation | 775-445-3240 | |

Detailed information regarding these and additional services may be found on the Western Nevada College website.

Nursing Scholarships and Emergency Funds

Designated scholarships may be available to nursing students through the Financial Assistance office. Scholarship applications must be on file by March 1. All pre-nursing and current nursing students are encouraged to apply for funding. Please contact the WNC Foundation at 775-445-3240 for more information.

Services for Students with Disabilities

Assistance for students with disabilities is available through the *Office of Disability Support Services*, which is located in Cedar Building, Room 208. Students may request an appointment with Susan Trist, Coordinator of Disability Support Service by calling (775) 445-4459.

It is the responsibility of students to provide documentation of a disability to the Counseling Office in order to provide the appropriate accommodation. Susan Trist will notify faculty that the student has filed with the office and will discuss recommended accommodations. It is the student's responsibility to discuss what the needed accommodations are with the involved faculty member after meeting with Susan Trist.

SECTION VIII GENERAL INFORMATION

Change of Name, Address, and Telephone Numbers (home, cell, work)

Any change of name, address, or telephone number must be immediately reported to the Nursing and Allied Health Office, and Admissions and Records. Accurate information must be on file in order for the offices to contact students in a timely manner in the event of an emergency and to ensure records are in order.

Communication with Nursing Students

The Office of Nursing & Allied Health will use the **email system** to contact students regarding a variety of topics, including requested health information and course registration numbers. It is the responsibility of the student to check email communication Monday through Friday. Students will be held accountable for all information transmitted through the email system. Students are also required to be in prompt communication with the Office of Nursing and Allied Health when notified to present requested information.

Company and Children

Childcare at WNC is available to students on a first come/first serve basis. No company, including children, is allowed to attend classes, program orientations, clinical preparation experiences, clinical laboratory experiences, conferences, or workshops.

Employment

The nursing program is physically, emotionally, and academically demanding. Students may work during the program, but it is recommended that they do not work full time. Faculty may recommend that students with a heavy work schedule modify their work commitments if employment is interfering with meeting the objectives of the nursing program. **Students may not work any evening or night, 8-hour prior to a clinical experience.**

Travel

Clinical instruction is provided throughout the program in conjunction with classroom theory. This instruction is provided in various locations, such as on campus, hospitals, long-term care centers, doctors' offices, and at other community facilities. Day, evening, and weekend time periods will be utilized for student clinical experiences. Students are responsible for their own transportation to and from the college and clinical facilities. Some clinical facilities may require additional travel time from home or campus. Many of the students have been able to meet their transportation needs by making arrangements with others in the class. It is the students' responsibility to anticipate when additional travel time is needed. Nursing students are not permitted to transport patients in private vehicles for any purpose.

Inclement Weather

Inclement weather may result in cancellation of class or clinical experiences.

Students are requested to contact their clinical faculty member if they are unable to safely travel to the clinical site. Students are also requested to check the WNC website or the WNC Facebook page for cancellation of classes.

Email and Canvas Communication

The faculty use email and Canvas to post notices, communicate changes, post grades and receive student assignments. It is the responsibility of students to check their email and Canvas on a regular basis.

Nursing Program Pinning Ceremony (Attire - graduation gown.)

A Nursing Program Pinning Ceremony is held each year following final examinations and adjunct to college graduation. The ceremony celebrates the accomplishments of the students in the presence of families, friends, faculty, and college administration. The highlight of the ceremony occurs when the nursing pin is affixed to the graduate's clothing by the graduate's family and/or friends. The Nursing Program pin identifies the student as a graduate of the Nursing Program at Western Nevada College. Information on the process for ordering of pins will be discussed with second year students during the 3rd semester of the nursing program.

Appendices

Appendix A

Western Nevada College

**Nursing Program Complaint/Grievance Form
(Required for Step II)**

Student Name: _____ **Date:** _____

Date of event: _____ **Place of event:** _____

Course: _____

Faculty member/s involved: _____

Date of meeting with involved faculty member/s (Step I): _____

Describe the circumstances leading up to the formal submission of the complaint/grievance form.

State the desired outcome.

Student signature: _____ **Date:** _____

Submit form to the Office of Nursing & Allied Health within 1 week following completion of Step 1.

APPENDIX B

NURSING LABORATORY REFERRAL FORM

Student Name: _____

Faculty Name: _____

Course: _____

Date of Referral: _____

To be initiated by the faculty member:

Statement of the problem:

Procedure/s to be practiced:

Timeline: To be completed by:

To be initiated by the nursing laboratory faculty:

Brief description of practice

Date completed:

Laboratory faculty signature: _____

Student signature: _____

Laboratory faculty requested to return this form to the faculty of record.

APPENDIX C

Nursing and Allied Health Blood-borne Pathogen Exposure and Prevention Policy for Students

The Nursing and Allied Health Division has developed a ***Blood-borne Pathogen Exposure and Prevention Policy*** in compliance with the Occupational Safety and Health Administration (OSHA) Standards. The policy is intended to provide direction to students and faculty to help prevent exposure to blood borne pathogens and to provide guidance should such exposure occur.

If an exposure occurs at a clinical site, the blood borne exposure and prevention policy in effect at the clinical site will take precedence over WNC's blood borne exposure and prevention policy. However, the program must also follow the WNC blood borne pathogen exposure and prevention policy outlined below.

Purpose and Policy

The purpose of this policy is to reduce the risk of student exposure to air and body substance pathogens such as, but not limited to tuberculosis, Hepatitis B Virus (HBV), Hepatitis C Virus (HCV), and the Human Immunodeficiency Virus (HIV).

Standard Precautions is an approach to infection control that requires the application of blood and body fluid precautions for all patients and patient specimens regardless of diagnosis. Standard precautions will be the minimum standard of practice throughout courses offered in the Nursing and Allied Health Division at WNC where blood borne pathogen exposure could occur.

Methods of Compliance

Students must become familiar and comply with the WNC Blood-borne Pathogen Exposure and Prevention Policy. Students must also become familiar and comply with the exposure plan (needle stick policy) of the clinical sites to which they are assigned. Should a potential blood-borne pathogen injury occur at a health care institution, the policy of the health care institution will be followed as it pertains to testing and initial treatment.

Prevention of Blood-borne Pathogen Exposure:

Education and Training in Standard Precautions and Body Substance Isolation

Procedures:

- Students will be required to participate annually in Blood-borne Pathogen Exposure Prevention and Control Class. The student must also have satisfactorily demonstrated skill in using protective equipment and procedures before receiving a patient care assignment.
- Annual education sessions are mandatory. Special training sessions may be set up prior to entering any clinical rotation.

Vaccines: Prior to admission into the nursing program, students are required to submit evidence of having received:

- Two **MMR** immunizations (for rubella, rubeola and mumps).
Students may evidence immunity to measles, mumps and rubella through submission of positive titers for rubeola, rubella and mumps.
- One dose of **tetanus** vaccine within the last 10 years (must be TDAP or DTAP).
- At least two doses of **Hepatitis B** vaccine prior to the start of clinical experiences. The third dose of Hepatitis B vaccine must be on file prior to the start of the 2nd semester.
Note: Students may sign a declination form in lieu of the Hepatitis B vaccine.
- Proof of immunity by immunization (2 doses) is required for Varicella (chicken pox)
- Annual TB screening results. If a positive TB screening occurs, students are required to submit evidence of a negative chest x-ray.
- Students are required to submit proof of receipt of a flu vaccine by the date identified by health care facilities. Date is generally around October 1st.

Student Acceptance of Clinical Assignment

Students who have received formal classroom instruction in blood-borne pathogen exposure control and can satisfactorily demonstrate knowledge and skills requisite for such care are expected to accept clinical assignments to

meet the course objectives. The decision to exempt a student from clinical experience will be made on a case-by-case basis by the faculty responsible for the clinical course.

Insurance:

All students must hold major medical /surgical health insurance upon entering and throughout their enrollment in the nursing program. It is the student's responsibility to obtain and pay for this insurance, as well as to understand the benefits and limitations of any insurance policy they maintain or is maintained on their behalf.

HIV Screening

The Western Nevada College Division of Nursing and Allied Health will not undertake any program of screening faculty or students for antibody to HIV. Any student or faculty wishing to be tested will be referred to his/her private physician.

Accidental Exposure Incidents

A student in the WNC Division of Nursing and Allied Health who has exposure to blood, body fluid or other potentially infectious material to non-intact skin or mucous membranes from a needle stick, sharps injury or other cause must immediately:

- Wash needle stick and cuts with soap and water
- Flush splashes to the nose, mouth or skin with copious amounts of water
- Irrigate eyes with clean water, saline or sterile irritants
- Remove soiled personal protective equipment and/or clothing

After washing, flushing and/or irrigating the exposed area, the student must immediately:

- Notify the appropriate registered nurse at the clinical facility
- Notify clinical faculty who will then notify the supervisor within the healthcare facility. (If there is a witness to the incident, have them do this immediately if possible.)
- Identify the source of the exposure.
- Seek medical evaluation. Medical evaluation should take place within 1 to 2 hours of the exposure. Medical evaluation may be completed at the healthcare facility of the clinical agency; with a private health care provider; at an urgent care facility; or at an emergency room.

In addition, the student must:

- Complete an incident report at the clinical facility, if required; and be aware of and follow any reporting and follow-up requirements of the clinical facility.
- Complete a **WNC Clinical Incident/Accident Report** with the clinical faculty. If possible, a copy of the report should be taken to the medical center when initial medical evaluation takes place.
- Also, send the complete report through their clinical faculty to the WNC Director of Nursing and Allied Health.

Additional responsibilities:

- The clinical faculty must notify the WNC Director of Nursing and Allied Health of the incident as quickly as possible
- It is the student's responsibility to make his/her healthcare provider aware of the result of any blood panel drawn as a result of an exposure
- It is the student's responsibility to follow-up with any counseling recommended by his/her healthcare provider as a result of an exposure.
- It is the student's responsibility to follow-up with any treatment recommended by his/her healthcare provider as a result of an exposure
- The student has financial responsibility for any cost associated with evaluation, treatment and/or counseling that results from an exposure.
- It is the student's right to file a tort complaint to the state attorney general if the injury was caused by the negligence of WNC.

Source information:

The clinical facility will collect as much information as possible from the source patient following an exposure. While the college will make every effort to maintain confidentiality, the college cannot be held responsible for act and omissions of the clinical agency.

***Guidelines for Exempting Students from Clinical Assignment to Patients with Blood-borne Diseases:**

Confirmed Pregnancy:

- The risk of transmission of HIV infection to pregnant health care workers is not known to be greater than the risk to those not pregnant.
- The risk of transmission of other pathogens such as cytomegalovirus from patients with AIDS to pregnant health care workers is unknown, but is thought to be low to nonexistent.

Based on the above information, there is no epidemiological reason to exempt pregnant students from caring for patients with blood borne diseases.

Incompetent Immunological Systems:

Students with diagnosed immunological deficiencies are at an increased risk for developing opportunistic infections that may be present in patients with blood-borne diseases, as well as other non-infected patients.

The Centers for Disease Control (CDC) does not recommend barring HIV-infected health care workers from practicing their profession. There is no evidence that infected nurses have ever infected a patient with HIV in the process of providing nursing care. Although there is evidence that one dentist infected patients with HIV, the mechanism of transmission has not been established. Look back studies on a number of HIV-infected dentists and surgeons have not discovered any transmission to any of their patients.

Based on this information, students with HIV infection need not be restricted from clinical experience unless they have some other illness for which any health care worker would be restricted. Symptoms of HIV (i.e. fatigue, paresthesia, vision problems, or dementia) may limit a health care worker's ability to safely practice.

Infections:

Any student with an infectious process could further compromise the patient with an incompetent immunological system. Therefore, all students with exudative or weeping skin lesions will be restricted from direct patient care contact.

The decision to exempt a student from clinical experience will be made on a case-by-case basis by the faculty responsible for the clinical course. Decisions about longer exemptions (more than one clinical session) will be made in consultation with the student's physician and appropriate college faculty/administrators. Students with infections or open wounds are required to obtain written permission from their physician to return to WNC classes and clinical facilities.

Recordkeeping/Confidentiality

Records from testing, vaccination and training will be maintained by the WNC Division of Nursing and Allied Health. Within the Code of Federal Regulations are statements designed to protect medical information and the privacy of the individual, providing there is no overriding need for the public to know. To mandate that a person infected with HIV be required or requested to notify college authorities is difficult, if not impossible to enforce and legally challengeable. Individuals involved with health care-giving services that know they are infected with a blood borne disease are ethically and legally obligated to conduct themselves responsibly in accordance with the following protective behaviors.

1. Seek medical advice.
2. Follow college and/or agency guidelines when involved in direct patient care.
3. Be knowledgeable about and practice measures to prevent transmission of blood-borne diseases

No specific or detailed information concerning complaints or diagnosis will be provided to faculty, administrators, or even parents, without the express written permission of the individual in each case. This position with respect to health records is supported by amendment to the Family Education Rights and Privacy Act of 1974. Health officials and other institutional officers must remember that all confidential medical/health care information is protected by statutes and that any unauthorized disclosures may create legal liability.

APPENDIX D

EXPOSURE TO BLOOD-BORNE PATHOGEN FORM

Complete the following form and return it to the Director of Nursing and Allied Health.

Student Name: _____ Faculty Name: _____

Exposed Individual's Name: _____ Date of Birth: _____

Address: _____

Telephone number: _____ Cell: _____

Source of exposure (state name of person if applicable): _____

Date of occurrence: _____ Time occurred: _____ Time reported: _____

Name and title of person initially notified: _____

Location of occurrence: _____

Check the following that apply to the occurrence:

- percutaneous exposure (break in the skin that causes bleeding)
- mucous membrane contact (eyes, mouth, nose)
- chapped skin, abraded skin, dermatitis
- exposure to chemical
- other, explain _____

Where blood-borne pathogens (blood, saliva, body fluids, contaminated solutions, etc.) involved? **Yes** **No**

Explain: _____

Describe the incident precisely: _____

What did you do after being exposed? _____

How do you feel this incident can be prevented in the future? _____

Signature of person making report: _____ Date: _____

Signature of faculty if applicable: _____ Date: _____

Signature of Director of Nursing & Allied Health: _____ Date: _____

APPENDIX E

Impairment Policy for Nursing and Allied Health Students

Nursing students are representatives of the WNC during their nursing studies and clinical experiences. Accordingly, the Division of Nursing and Allied Health must recognize and respond to inappropriate behaviors and performance, which may be attributed to substance abuse and/or emotional illness.

Applicability: This policy applies to students enrolled in nursing and allied health program and courses.

Purpose: The purpose of this policy is to encourage students to self-identify themselves as having physical, cognitive or emotional conditions affecting their performance to seek and receive evaluation and treatment. In addition, it is the purpose of this policy to identify and assist students who have not yet recognized signs of potential impairment in themselves or identified themselves as having medical or emotional conditions leading to future impairment.

Philosophy: The philosophy of the Department of Nursing and Allied Health at WNC regarding nursing students who are impaired by substance abuse or emotional illness follows:

- We believe that personal and health problems arising from these diseases can affect academic and clinical performance, making the student a danger to self and clients.
- We believe that human beings can learn and change behaviors and that nursing students with diseases can be encouraged to seek help in order to recover.
- We believe that the nursing student has the primary responsibility to seek treatment.
- We are committed to confidential handling of recognition and treatment of these diseases.

Signs and Symptoms of the Impaired Nursing Student: Signs and symptoms of nurses abusing alcohol, drugs, or experiencing emotional impairment include, but are not limited to, the following:

Lack of enthusiasm-increasing absenteeism, arriving late and wanting to leave early, frequently requesting time off, taking extended meal and coffee breaks and refusing difficult or additional assignments; odor of alcohol or marijuana on breath; slurred or incoherent speech; chronic drowsiness and /or sleepiness; tremors of hands; disorientation; unusually aggressive behavior; unexplained acute work errors; lack of coordination; unreasonable resentment, suspiciousness, overreaction to criticism; controlling behavior and inflexibility; isolation and withdrawal; irritability and mood swings; blaming, defensiveness and frequent conflicts; difficulties with interpersonal relationships; forgetfulness; frequent trips to the bathroom; repeated use of breath mints or mouth wash; deteriorating appearance; blackouts; unexplained nausea and vomiting or diarrhea; tremors, anxiety; hangovers; unexplained diaphoresis; unexplained sniffing, sneezing, watery eyes; unusual, unexplained weight loss or gain; frequent complaints of illness or injury; excessive bruising on arms, ankles, and hands.

Procedure Identification

- When there is concern that a student is exhibiting signs and symptoms of impairment and/or poses a risk of harm to self or patients based on observation of signs or symptoms of impairment or self-identification by the student, the faculty member may remove the student from the classroom, learning skills laboratory or clinical area. The faculty member may, but is not required, to request the student to submit to “for cause” drug and/or alcohol screening to confirm the faculty member’s concern that the student is impaired and/or poses a risk of harm to self or patients based on the faculty member’s observations. A student’s refusal to submit to such testing will be deemed an admission of impairment which poses a risk of harm to self or patients.
- A student removed from the classroom, learning skills laboratory or clinical practice shall be sent to the Division of Nursing and Allied Health office to meet with a representative of the college as soon as practicable.
- If warranted by the student’s condition, the faculty, campus security, or a representative from the college may accompany the student to the nearest healthcare facility for emergency treatment. If emergency treatment is not warranted, but immediate transportation home is necessary, transportation arrangements will be made for the student. The cost of the transportation will be the responsibility of the student.
- At the meeting, documented evidence of impaired classroom, learning skills laboratory or clinical performance will be reviewed with the student and the student will have an opportunity to provide an explanation.

- If the cause of the impaired performance is satisfactorily explained to the college, the student may be permitted to return to the classroom, learning skills laboratory or clinical area at the discretion of the Director of Nursing and Allied Health or her designee.
- If the cause of the impaired performance is not satisfactorily explained to the college, the impaired performance may result in a disciplinary sanction pursuant to WNC Policy 3-4-4, Student Conduct, or the imposition of an academic sanction including dismissal from the nursing program pursuant to WNC Policy 3-5-5, Student Program Dismissal Procedures and Referral and Treatment.
- Before being permitted to return to the classroom, learning skills laboratory or clinical area, the student may be required to obtain an appropriate health assessment. This assessment and any recommended treatment is at the student's expense.
- The student has the right to refuse this assessment, any recommended treatment, and further monitoring. However, at the discretion of the Director of Nursing and Allied Health or her designee, the student may not be permitted to return to the classroom, learning skills laboratory or clinical practice without certification from a recognized healthcare provider that he/she is either undergoing treatment or does not need treatment and is fit for duty.
Return to Classroom, Laboratory and Clinical Practice
- If the student has been referred for treatment, the student will be permitted to return to the classroom, learning skills laboratory or clinical practice only on the approval of an appropriate treatment provider who certifies that the student is capable of safe and skilled classroom, laboratory and clinical performance.
- Confidential medical information will be maintained in file with restricted access in the Office of Nursing and Allied Health.
- Information will be shared with treatment providers and others designated by the student, with the student's written consent. The student may also be asked to give written permission for treatment providers and others to share information with a representative of the college as needed.
- No information will be shared with other members of the Division of Nursing and Allied Health unless there is a clear and direct need to know.
- The student and the school will sign an agreement, individualized according to the student's needs. This agreement will delineate the terms of the student's return to the classroom, laboratory and clinical practice.
- The Division of Nursing and Allied Health has the right to impose conditions on the student's return to classroom, laboratory and/or clinical practice as necessary upon the student's certification that he/she is capable of safe and skilled classroom, laboratory and clinical performance.
- The Division of Nursing and Allied Health will provide direct supervision of the student following return to school, laboratory and clinical practice and will monitor the progress of the student.
- Any behaviors that indicate unsafe classroom, laboratory and/or clinical performance may result in a disciplinary sanction pursuant to WNC Policy 3-4-4, Student Conduct, or the imposition of an academic sanction including dismissal from the nursing program pursuant to WNC Policy 3-5-5, Student Program Dismissal Procedures.

APPENDIX F

CLINICAL RELATED INCIDENT/ACCIDENT FORM

An incident/accident is any event that is not consistent with the routine operation of the hospital/agency, or with the routine care of a patient. It may be an incident/accident or a situation, which might result in an accident or injury.

Student's Name: _____ Date: _____ Course #: _____

Location of Clinical Related Incident/Accident (Health care agency and room/unit)

Describe incident/accident in detail, and any resulting injuries:

Reported to: _____ Date: _____ Time: _____

Physician notified: _____ Was person seen by doctor? ____ Yes No ____

List witnesses:

Action taken/treatment ordered:

Analysis of what could/should be done to prevent incident/accident in the future:

(Student signature) (date)

(Faculty signature) (date)

Submit completed form to the Director of Nursing and Allied Health

APPENDIX G
Western Nevada College
Nursing Program
Student Performance Improvement Plan (PIP)

Student Name: _____ Date: _____

Course Number: _____

Clinical Site: _____

Faculty: _____

The student Performance Improvement Plan (PIP) signifies commitment between the student and faculty to establish a performance improvement plan to correct identified knowledge and or behavioral deficits. The student is asked to use reflection and self-evaluation during the remediation process. In turn, the faculty will provide the student with the necessary guidance, support and resources as outlined in the PIP for student success.

Purpose:

1. Provide the student with individualized, specific and mutually-agreed upon action steps to improve student performance.
2. Promote professional responsibility and accountability in class, clinical experiences, simulation, lab or when representing WNC.

A copy of the signed document is given to the student. The original PIP should be routed to the Director at the program site for her signature and for record keeping in the student file. A copy of the PIP will be shared with the lead faculty member.

Check any areas needing improvement:

- Attendance/Punctuality
- Accountability
- Communication
- Flexibility Integrity
- Spirit of Inquiry
- Initiative/Independence
- Professional Appearance
- Preparedness
- Understanding of Pathophysiology
- Synthesis of Theory and Practice
- Critical Thinking/Decision Making
- Use of Nursing Process
- Oral communication/Written Communication
- Completion of Written Assignments
- Technical Proficiency/Skills Organizational Skills/Time Management
- Other

Description of Incident/Situation

Written documentation (times, place, people) may be attached.

1. List of learning outcome(s) not met or behaviors needing remediation (List of Nursing Program Student Learning Outcomes attached:)

2. Detailed description of how the student's performance is not meeting the learning outcomes:

3. Expectation/SMART Goal:

4. Interventions/Action Plan:

5. Consequence if performance or behaviors are not improved.

6. Evaluation plan, including future meetings and consequences if behaviors and performance do not improve.

APPENDIX J

Western Nevada College Nursing Program

Student Handbook Signature Page

I hereby verify that I have received and reviewed the orientation materials and the *Western Nevada College Associate Degree Nursing Program Student Handbook*. I acknowledge I am responsible and accountable for all policies and requirements as stated in the handbook. I also understand that I will be notified of any changes in policies and requirements that occur during enrollment in the Nursing Program, and will abide by any changes as they apply.

I agree to uphold the honor code of the WNC Nursing Program. To this end I agree to refrain from participation in activities of plagiarism or cheating, nor will I tolerate the activities of others who do so. I also will not receive or tolerate activities of others to obtain information regarding content on examinations or written assignments.

Print Name: _____

Signature: _____

Date: _____

(The signed form will be collected during the 2nd First Year Nursing Program Orientation in August)

APPENDIX K

AUTHORIZATION TO RELEASE INFORMATION FORM

Student: _____ Date: _____

As a student enrolled in the Nursing Program at Western Nevada College, I give permission to the program to release the following information to health care organizations with which the college affiliates.

TB Skin test, TB blood test, or chest x-ray results

Verification of required immunizations

Verification of holding current American Heart Association Healthcare Provider CPR certification

Verification of holding current health insurance

Verification of an acceptable background check and drug screen

(Print Name)

Student Signature

Date

(The signed form will be collected during the 2nd First Year Nursing Program Orientation in August)

APPENDIX L
WAIVER OF LIABILITY FORM

I have received and read the Disclosure of Exposure to Potential Health Risks. By participating in the clinical program, I waive any and all claims and causes of action, present and future, against the Board of Regents of the Nevada System of Higher Education and Western Nevada College, and their respective officers, agents and employees arising out of my participation in the clinical program and resulting in injury, physical or mental illness, disability, or death.

I acknowledge that this waiver is made freely, voluntarily, and under no compulsion.

Student Print Name: _____

Student Signature: _____ Date: _____

Witness Signature: _____ Date: _____

(The signed form will be collected during the 2nd First Year Nursing Program Orientation in August)

APPENDIX M

WNC Simulation Center/Laboratory Confidentiality Agreement and Release Form

In consideration of the educational opportunity to obtain practical experience in a simulated patient environment, I understand the significance of confidentiality with respect to information concerning the simulation scenarios, the simulated patients, and fellow students. I understand that active participation in the simulation scenarios is part of the course requirements. In addition, I understand that the simulation scenarios are videotaped and used for debriefing purposes and shared only with appropriate faculty.

I agree to adhere to the following conditions and guidelines:

- The simulation mannequins are to be treated with respect and handled with care as if they were live patients.
- As the simulation mannequins are to be treated as live patients, I will uphold the requirements of the Health Insurance Portability and Accountability Act (HIPAA) and any other Federal or State Laws regarding confidentiality. I agree to report any violations of confidentiality that I become aware of to my facilitator or instructor.
- All patient information, including but not limited to diagnosis, interventions, laboratory values, medications, and vital signs, used in the simulation scenario is privileged and confidential regardless of format: electronic, written, overheard or observed. As such, any viewing, discussion, or disclosure of this patient information to another student is a violation whether intentional or unintentional and may lead to disciplinary action or dismissal from the nursing program.
- The simulation laboratory is a learning environment. All students are expected to demonstrate behaviors that maintain this respectful and supportive learning environment. The students participating in the scenario should have everyone's respect and attention. All scenarios should be treated in a professional manner.
- No Betadine and no ink pens will be used near the mannequins. In addition, 20g IV catheters or smaller will be used for IV starts.
- The undersigned authorizes and consents to the use of the undersigned's name, voice, photograph, video recording, and likeness by Western Nevada Nursing Program without reservation or limitation and with the understanding that the undersigned will not receive compensation.
- Western Nevada College has the absolute rights and permission, with respect to the photographs and videotaped images taken of me or in which I may be included with others, to use such images for educational purposes and training only. This authorization and release shall apply to the person(s) for whom the photographs or videotaped images were taken for educational purposes only.
- **I have read and understand the Simulation Lab Policy, and have been provided a copy.**
